

Cordless Electric Kettle with Auto Shut-Off

This electric kettle quickly boils water with its concealed heating element. It includes an automatic shut-off feature for safety and a cordless design for easy pouring.

Product Overview

Efficient Boiling Solution

This cordless electric kettle is designed for rapid boiling and effortless operation in professional or home kitchen environments. Featuring a concealed heating element and a generous 1.7L capacity, it provides consistent performance while ensuring safety through an automatic shut-off function. The ergonomic design, including a non-drip spout and clear water level indicators, makes it a reliable choice for daily use.
