

Cordless Electric Kettle with Automatic Shut-Off

This cordless electric kettle features a water level viewing window and automatic shut-off for safety. It is equipped with a concealed heating element for fast boiling and ease of use.

Product Overview

Efficiency Meets Design

This cordless electric kettle is engineered for both speed and convenience in professional environments. Featuring a high-performance concealed heating element, it offers rapid boiling times while maintaining a sleek, cream-colored aesthetic with light blue accents. The inclusion of a water level viewing window and an automatic shut-off mechanism ensures both ease of use and operational safety.
