

Cordless Flat Wire Drawing Machine for Stainless Steel

This lithium-powered electric wire drawing machine is designed for stainless steel flat surfaces. It features a robust motor and a durable wire drawing wheel, providing efficient and consistent results.

Product Overview

Professional Cordless Wire Drawing Solution

This lithium-powered electric wire drawing machine is specifically engineered for stainless steel flat surfaces, delivering efficient and consistent finishing results. Designed for professional use, it features a robust motor and an ergonomic handle that ensures comfortable, prolonged operation in various environments. The cordless design provides superior mobility, while the integrated safety guard offers essential protection during use.

Power & Battery

Battery Voltage	18 V
Battery Capacity	4 Ah
Battery Chemistry	Lithium-Ion

Design & Features

Power Source

Cordless • Battery Powered

Safety Features

- Integrated safety guard
- Ergonomic handle design
