

Cordless Gas Nail Gun

This cordless nail gun drives nails into various materials. It is powered by a fuel cell, eliminating the need for hoses or compressors.

Product Overview

Professional Cordless Performance

This cordless gas nail gun is designed to provide maximum portability and convenience on the job site by eliminating the need for external air compressors or hoses. Utilizing a small gas combustion engine powered by a fuel cell, it delivers reliable power for demanding tasks. Built with durable materials, this tool is engineered to withstand rigorous daily use in professional construction environments.

Technical Specifications

Power Source	Gas combustion engine (Butane/Propane fuel cell)
Operation	Cordless (no compressor required)
Safety Mechanisms	Accidental firing prevention, Adjustable depth of drive

Applications

Primary Applications

- Framing
- Roofing
- Fencing
- Trim work
