

# Cordless Hot Melt Glue Applicator

This 18V cordless glue gun is designed for portable and convenient bonding applications. It features rapid heating and precise glue dispensing.

## Overview

### Professional Cordless Performance

This cordless hot melt glue applicator is engineered for efficiency and portability, featuring an extremely rapid 20-second preheating time. Designed for professional and DIY use, it offers unrestricted movement with its 18V battery system and includes precision features like an anti-drip nozzle. The integrated LED status indicators ensure safe and convenient operation, making it a reliable tool for various bonding applications.

## Performance

Heating Time	20 seconds
Max Temperature	200 °C
Glue Output Rate	8 g/min

## Power & Battery

### Battery Specifications

<b>18 V</b> Rated Voltage	<b>2000 mAh</b> Capacity	<b>36 Wh</b> Energy
------------------------------	-----------------------------	------------------------

### Charging Information

Parameter	Value
Charging Time	1.5-2.0 h
Charging Current	2.4 A
Output Voltage	22 V

## Features

### Key Features

- Extremely fast 20-second preheating
- Auto-off safety function
- Portable cordless design
- Anti-drip precision nozzle
- LED status indicators (Battery/Ready)

### Safety & Operation

Cordless, Auto-Off, LED Indicators, Anti-Drip
