Overview

High-Performance Cordless Versatility

This cordless oscillating multi-tool is engineered for high efficiency and reliability across diverse sawing, cutting, grinding, and scraping applications. Featuring a compact and lightweight design, it ensures ease of operation for professional users while maintaining safety standards. With advanced battery protection systems and durable transmission components, this tool is built for longevity and precision in demanding environments.

Performance & Safety

Certifications

GS Certified

Motor Performance

High efficiency DC motor

Safety Features

Anti-self-locking switch, Overcurrent protection, Overvoltage protection, Undervoltage protection, Overtemperature protection

Technical Specifications

Power System

20 V

Voltage

Supported Tasks

- Sawing
- Cutting
- Grinding
- Shoveling
- Sanding
- Scraping

Cutting Angle Range

45 degrees
