

# Cordless Power Drill 12V

This cordless power drill is designed for drilling and screw driving tasks. It features variable speed settings, an ergonomic grip, an integrated LED light, and operates on a 12V battery system.

## Product Overview

### Professional Cordless Performance

This 12V cordless power drill is designed for versatility and ease of use in various drilling and screw-driving applications. Featuring an ergonomic grip and a compact form factor, it ensures operator comfort during extended tasks. The integrated LED light enhances visibility, making it a reliable tool for precision work in diverse materials.

## Technical Specifications

### Voltage

**12 V**

System Voltage

### Primary Applications

- General Drilling
- Screw Driving
- Material Fastening

### Key Features

Variable Speed, Integrated LED Light, Ergonomic Design, Compact Build

### Model Identifier

LT700001
