

Cordless Power Impact Driver

This cordless impact driver is engineered for efficient fastening. It features variable speed control and a compact design, making it suitable for various tasks.

Product Overview

High-Performance Cordless Impact Driver

This cordless impact driver is engineered for demanding fastening applications across construction and automotive repair sectors. It features a powerful motor designed for high efficiency and a compact form factor that allows for easy access in tight, restricted spaces. With variable speed control, users can achieve precise results, while the ergonomic grip ensures comfort during extended operation.

Key Features

Core Capabilities

- Powerful motor for efficient driving
- Variable speed control for precision
- Compact design for tight spaces
- Ergonomic handle grip

Ideal Applications

Construction, Automotive Repair, Fastening

Power & Compatibility

Power Source

Cordless

Battery Included

No

Charger Included

No
