

Cordless Reciprocating Saw for Demolition and Cutting

This cordless reciprocating saw is a versatile tool for cutting through various materials. It features a high-performance motor, variable speed control, and a quick-change blade system.

Overview

High-Performance Cutting Solution

This cordless reciprocating saw is engineered for demanding demolition and general cutting tasks. Featuring a brushless motor and 18.0V power system, it delivers consistent performance across a variety of materials. Its ergonomic, lightweight design minimizes operator fatigue, making it an ideal choice for professional remodeling and construction environments.

Technical Specifications

Motor Technology

Brushless

Voltage

18 V

Operating Voltage

Key Features

- Variable speed control
- Quick-change blade system
- Ergonomic handle design
- Lightweight construction

Applications

Primary Applications

Demolition, Remodeling, General Cutting
