

Cordless Stainless Steel Electric Kettle with Wooden Accents

This cordless electric kettle features a polished stainless steel body with wooden handle and base. It is designed for convenient and safe boiling, allowing for cordless pouring.

Product Overview

Elegant Cordless Design

This cordless stainless steel electric kettle combines functional efficiency with a modern aesthetic, featuring sophisticated wooden accents on the handle, lid, and base. Designed for professional or high-end domestic environments, it offers a seamless pouring experience by separating the kettle from its powered base. The polished stainless steel construction ensures durability while providing a clean, professional look.
