

Cordless Tube Belt Sander

This cordless tube belt sander is a portable power tool designed for sanding and finishing cylindrical workpieces. It features a compact design, variable speed control, and a quick-change belt system.

Product Overview

Professional Cordless Tube Belt Sander

This cordless tube belt sander is a highly portable power tool engineered specifically for the precision sanding and finishing of cylindrical workpieces. Designed for versatility, it features an adjustable sanding arm and an ergonomic grip, allowing operators to access tight or complex spaces with ease. The integrated dust extraction port ensures a cleaner working environment, while the variable speed control system allows for optimal performance across a wide range of materials.

Performance

Speed Settings	6 levels
