Product Overview

Advanced Cordless UV Sanitization

This cordless UV bed vacuum cleaner is specifically engineered to eliminate dust mites, bacteria, and allergens from soft surfaces like mattresses and sofas. Combining powerful suction with UV-C light technology, it provides a deep-cleaning solution that sanitizes while it vacuums. Its lightweight, ergonomic design and cordless operation ensure a convenient and thorough cleaning experience for professional and domestic environments alike.

Core Features

Key Benefits

- UV-C light for effective sterilization and bacteria removal
- High-efficiency dust mite elimination
- Cordless design for unrestricted movement
- Advanced filtration system to trap fine particles
- Transparent dust container for easy monitoring
