

# Cordless Water Flosser for Oral Cleaning

This portable water flosser uses high-frequency water pulses for effective cleaning. It features multiple modes, including options for daily use, deep cleaning, and gum massage.

## ADDITIONAL IMAGES

## Product Overview

### Professional Oral Care Solution

This portable cordless water flosser provides an effective way to improve oral hygiene with high-frequency water pulses exceeding 1500 per minute. Designed for versatility, it features three distinct cleaning modes including daily, strong, and pulse settings to accommodate various sensitivities. Its compact, rechargeable design makes it an ideal solution for maintaining healthy gums and teeth at home or while traveling.
