Overview

Professional Core Drilling Performance

This handheld core drilling machine is engineered for high-intensity drilling tasks in concrete, cement, and masonry walls. It features a high-torque motor with significant overload capacity, ensuring continuous and reliable operation on demanding job sites. Designed with operator safety and durability in mind, the unit incorporates advanced mechanical safety clutches and impact-resistant housing for long-term professional use.

Technical Specifications

Model Number	Z1Z-110/160
Overload Capacity	40 %

Features

Key Features

- Mechanical safety clutch for operator protection
- Cryogenic quenching gears for wear resistance
- Impact-resistant polycarbonate shell
- Corrosion-resistant output shaft
- Retractable shoulder pad
- Locked switch button for comfortable operation

Suitable Materials	Concrete, Cement, Masonry, Walls
