

Core Drilling Machine

This heavy-duty core drilling machine is designed for creating precise holes in concrete, masonry, and other hard materials. It features a robust motor, adjustable drill stand, and water cooling system for efficient and clean operation.

Product Overview

Professional Core Drilling Solution

This heavy-duty core drilling machine is engineered for creating precise holes in concrete, masonry, and other hard materials. It features a robust motor, an adjustable drill stand, and an integrated water cooling system to ensure efficient and clean operation. It is an ideal tool for construction, plumbing, and electrical applications where accuracy is paramount.

Technical Specifications

Key Features

- Robust motor for heavy-duty performance
- Adjustable drill stand for precision
- Integrated water cooling system

Model Number	Z1Z-254/25
Suitable Materials	Concrete, Masonry, Hard Materials

Use Cases

Target Industries

Construction • Plumbing • Electrical
