

Corner Pasting Machine for Rigid Boxes

This machine is designed for corner pasting of cardboard boxes. It features a compact design with an integrated control panel.

Product Overview

Precision Corner Pasting for Rigid Boxes

This Corner Pasting Machine is engineered specifically for the efficient and precise corner pasting of cardboard boxes. Featuring a compact design with an integrated control panel, it is optimized for professional box construction. The machine supports a wide range of box sizes and materials, ensuring reliable performance and enhanced structural integrity for your packaging needs.

Technical Specifications

Key Features

- Compact footprint
- Integrated control panel
- Versatile material compatibility
- High-precision application

Model Identifier	ZHCJ-I
Primary Application	Rigid Box Construction, Corner Pasting, Cardboard Packaging
