Product Overview

Corolla 10 Tail Light Assembly

This premium tail lamp assembly is precision-engineered for the Corolla 10 model, providing a direct replacement for original equipment. It features a sophisticated combination of LED and conventional lighting technology to ensure optimal visibility for brake, turn signal, and reverse functions. Built with high-durability plastic housing and weather-resistant seals, this assembly is designed to withstand harsh environmental conditions while maintaining long-lasting clarity and performance.

Technical Specifications

Integrated Functions

- Brake Light
- Turn Signal
- Running Light
- Reverse Light

Factory Code

wt-15-171

Lighting Technology

LED, Conventional Bulb
