Product Overview

High-Performance Stainless Steel Piping Solutions

These high-quality stainless steel pipes and fittings are engineered to deliver superior corrosion resistance and long-term durability in demanding industrial environments. Designed for efficiency and hygiene, they are an ideal choice for water supply systems, chemical processing, as well as the food and beverage sectors. The system supports secure, leak-proof installations for both plumbing and HVAC applications, ensuring reliable fluid and gas transfer.

Technical Specifications

Pressure Rating

10 bar

Pressure Rating

Nominal Sizes

DN150, DN50, 2in

Applications

Suitable Industries

- Plumbing Systems
- HVAC & Cooling Systems
- Chemical Processing
- Food & Beverage Industry
- Potable Water Supply

Features

Material Benefits

Corrosion Resistant • Durable • Hygienic • Leak-proof
