

Corrosion Resistant Stainless Steel Wire Rope

This high-strength stainless steel wire rope is designed for applications requiring corrosion resistance and durability. The rope is constructed from multiple strands of stainless steel, offering flexibility and high tensile strength.

Product Overview

High-Performance Stainless Steel Wire Rope

This premium stainless steel wire rope is engineered for exceptional corrosion resistance and durability in demanding environments. Available in a wide variety of grades and sizes, it offers high tensile strength suitable for marine, architectural, and industrial applications. Each reel is meticulously packed to ensure product integrity upon delivery.

Technical Specifications

Diameter Range	0.36mm - 20mm
Construction	7x7
Tensile Strength (MPa)	1570, 1670, 1770, 1870, 1960

Compliance and Standards

Material Grades

AISI 301 • AISI 304 • AISI 304L • AISI 316 • AISI 316L

Supported Standards

- DIN
- GB
- EN
- JIS

Logistics and Packaging

Available Packaging

- Strong wooden reels
- Fumigated plywood reels
- Coils
