

Corrugated Belt Conveyor

This conveying machine efficiently elevates materials to a specified height. It is suitable for use in pharmaceutical, chemical, and food industries.

Overview

Efficient Vertical Material Handling

This corrugated belt conveyor is designed as a specialized solution for automated production lines, particularly within the pharmaceutical, chemical, and food processing industries. It excels at elevating materials to required heights, seamlessly integrating with subsequent stages of the production process. Its robust design ensures reliable performance, making it an essential component for maintaining continuous, automated manufacturing workflows.

Technical Specifications

Model	PSJ-500
Frame Material	Stainless Steel
Belt Type	Corrugated High-Friction
Drive System	Geared Motor

Features

Key Features

- Variable speed control
- Automatic belt tensioning
- Integrated safety guards
- Adjustable support structure

Applications

Primary Function

Vertical Transport • Production Line Integration

Suitable Industries

Pharmaceutical, Chemical, Food Processing, Packaging
