Overview

Corrugated Flexible Wiring Conduit

This corrugated wire loom provides robust protection for cable and wire management applications, shielding against mechanical damage, UV radiation, weathering, and chemical exposure. Its highly flexible body is specifically designed to navigate tight corners and elbows with ease. Available in both standard and split styles, it ensures straightforward installation and removal for efficient cable organization.

Technical Specifications

Design Features

- Corrugated structure for enhanced flexibility
- Split style available for easy installation
- High structural integrity
- Suitable for tight routing and elbows

Available Colors

Black • Blue • Gray • White • Orange

Protection Capabilities

Mechanical Damage Resistance, UV Resistant, Weather Resistant, Chemical Resistant, Abrasion Resistant, Impact Resistant

Applications

Primary Industries

- Automotive
- Industrial
- Marine
- Electrical Installations
