

Corrugated Paper and Carton Box Digital Printer

This is a high-speed scanning digital printing machine. It is suitable for piece orders and small batch order production.

Product Overview

Industrial Digital Printing Solution

This high-performance digital printer is engineered specifically for corrugated paper and carton box applications. It combines advanced automatic feeding and suction technology with versatile printing modes, including both one-pass and scanning pass options, to deliver offset-quality results. Designed with an industrial-grade approach, it features robust ink management and stable operation to ensure efficiency and low long-term usage costs for professional environments.

Performance Metrics

Max Printing Speed

12 sheets/min

Sheets per Minute

Printing Modes

One Pass, Scanning Pass

Operational Features

Feeding & Handling

- Automatic paper feeding and unloading
- Smart suction platform
- 99% cardboard passing success rate

Ink System

- Automatic ink degassing system
- Large volume ink supply management
- Stable continuous printing capability

Environmental Requirements

Operating Conditions

Parameter	Requirement
Temperature	23 [^] 28
Relative Humidity	65% [^] 75%
Environment	Dust-free

Facility Requirements

Lightning protection • No vibration • Interference-free
