

Corrugated Roofing Sheet Roll Forming Machine

This roll forming machine is designed for manufacturing galvanized corrugated roofing sheets. It features a robust construction and includes a cutting mechanism and an output conveyor system.

Overview

High-Efficiency Corrugated Roofing Production

This professional-grade roll forming machine is engineered for the high-volume production of colored steel roofing sheets. Featuring a robust construction and an automated PLC touch screen control system, it ensures consistent quality and precision in every panel. Designed to meet the demands of modern steel construction, this new equipment offers reliable performance for your roofing manufacturing needs.

Technical Specifications

Power Consumption	5.5 kW
Operating Voltage	380V
Making Speed	10 m/min
Machine Dimensions (L*W*H)	8.5M * 0.8M * 2.3M

Operational Details

Control System	PLC (Touch Screen)
Monthly Capacity	30 sets
Primary Usage	Steel Roof Panel Production

Compliance & Support

Certifications	ISO9001
Warranty	1 year
After-sales Service	Engineers available to service machinery overseas

Logistics

Packaging Details	Full Container Load
Delivery Lead Time	60 days
