

Corrugated Roofing Sheet Rolling Machine

This machine is engineered for the efficient production of corrugated roofing sheets. It features a robust construction with multiple rollers designed to precisely form the desired corrugation pattern.

Product Overview

High-Efficiency Barrel Corrugated Rolling Machine

This barrel-type corrugated roofing sheet rolling machine is engineered for the high-volume production of precisely formed roofing materials. Featuring a robust industrial frame and a multi-roller system, it ensures consistent corrugation quality for both steel and aluminum sheets. The machine is equipped with an integrated control system for adjusting rolling speed and pressure, making it a reliable solution for professional manufacturing environments.

Technical Specifications

Key Features

Barrel Type Mechanism • Hydraulic Pressure Control • CNC Machined Rollers • Electrostatic Spraying

Feeding Material Thickness

0.12-0.3 / 0.16-0.4 mm

Max Feeding Width

1000 mm

Performance Metrics

Performance Highlights

12 m/min

Max Speed

4 T/hour

Max Capacity

Productivity Rate

9-12 meters per minute

Hourly Capacity

2-4 Tons per hour

Quality & Compliance

Certifications

CE, TÜV, SGS, ISO 9001

Manufacturing Process

Production Workflow

- Raw Material Preparation
- Precision Machining
- Base Plate Production
- Shot Blasting & Surface Cleaning
- Industrial Painting
- Component Assembly
- System Debugging & Testing
- Packing & Shipment

Service & Support

Support Services

- Customized machine version design
- On-site repair services by professional engineers
- In-house designed electrical control systems
- High-precision CNC ground rollers and shafts

Warranty Period

1 Year
