Product Overview

Industrial Grade Corrugated Suction Hose

This industrial-grade corrugated suction hose is designed to handle demanding fluid transfer and cable protection applications. Featuring a helical reinforcement within a durable PVC or high-grade plastic structure, the hose provides excellent crush resistance, flexibility, and anti-kinking properties. The smooth inner bore is engineered for efficient flow, making it an ideal choice for irrigation, pump systems, and industrial utility environments.

Material Characteristics

UV Resistant, Chemical Resistant, Corrugated Exterior, Smooth Bore

Applications & Use Cases

Typical Applications

- Water and fluid transfer
- Agricultural irrigation systems
- Industrial pump intake
- Electrical cable protection/conduit
- Power generation facilities
