

Cosmetic Bottle Mold

This mold is specifically designed for manufacturing cosmetic bottles. It ensures precise dimensions and consistent quality in the production process.

Product Overview

Precision Cosmetic Bottle Mold

This high-precision mold is engineered specifically for the cosmetic packaging industry, ensuring consistent quality and structural integrity for bottle production. Designed with advanced manufacturing techniques, it facilitates efficient molding cycles and precise dimensional accuracy. Ideal for high-volume production environments, this mold helps maintain strict quality standards for cosmetic containers.

Technical Specifications

Mold Type

Injection Mold • High Precision

Key Design Features

- Optimized cooling channels
- High-wear resistance
- Precision alignment pins
- Interchangeable inserts

Primary Application

Cosmetic Packaging Manufacturing
