

Cosmetic Box Wrapping Machine

This machine is designed for high-speed wrapping of perfume and cosmetic boxes. It features automatic film feeding and cutting, along with precise sealing to enhance product presentation and protection.

Overview

High-Efficiency Box Wrapping Solution

This cosmetic box wrapping machine is a next-generation solution designed to address common defects found in traditional cellophane packaging equipment. Utilizing patented technologies, it offers reliable and precise wrapping for a wide variety of boxed items, including cosmetics, pharmaceuticals, food products, and stationery. The machine ensures consistent performance and professional presentation, making it an ideal upgrade for manufacturers looking to streamline their packaging operations.

Performance Metrics

Packaging Speed

80 boxes/min

Max Speed (Models A/B/C)

25 boxes/min

Max Speed (Model 400)

Technical Specifications

Model Comparison

Model	Power (kW)	Weight (kg)
BTB-300A	5	500
BTB-300B	5	600
BTB-300C	5	600
BTB-400	5.5	1250

Packaging Materials

- Cellophane film
- Gold tear tape

Power Supply

220V 50Hz

Application

Suitable Industries

Cosmetics, Pharmaceuticals, Food & Beverage, Health Products, Stationery, Tobacco
