

Countersunk Head Sleeve Anchor

This countersunk head sleeve anchor is engineered for secure fastening in concrete, brick, and block. Its pre-assembled build ensures straightforward installation, with the sleeve expanding upon tightening for enhanced grip.

Product Overview

Professional Grade Sleeve Anchor

The Countersunk Head Sleeve Anchor is a high-performance fastening solution engineered for secure attachment in concrete, brick, and block surfaces. Its pre-assembled design streamlines the installation process, while the expansion sleeve mechanism ensures a durable and reliable hold. Featuring a countersunk head, this anchor is specifically designed for applications where a flush finish is required for aesthetic and safety purposes.
