

Countersunk Self-Tapping Screw

This is a countersunk self-tapping screw, designed to tap its own thread when screwed into a material. Its countersunk head ensures a flush finish.

Product Overview

Countersunk Self-Tapping Screw

This countersunk (CSK) self-tapping screw is engineered to DIN 7982 standards, providing a reliable fastening solution for various industrial and construction applications. Designed to create its own thread upon installation, it eliminates the requirement for pre-tapped holes, significantly streamlining assembly processes. The countersunk head design ensures the screw sits perfectly flush with the material surface, resulting in a clean, professional finish on metal, plastic, or wood substrates.

Technical Standards

Standard	DIN 7982
Head Style	Countersunk (CSK)
Functionality	Self-Tapping, Flush-Mounting

Application Compatibility

Compatible Materials

- Metal
- Plastic
- Wood
