

Countertop Alkaline Water Ionizer

This alkaline water ionizer features a digital display and multiple water settings. It is designed for countertop installation and includes a flexible hose for dispensing water.

Overview

Professional Countertop Ionization

This countertop alkaline water ionizer is designed to provide versatile water treatment options for professional or home environments. Featuring advanced electrolysis technology with pure titanium and platinum-coated plates, it ensures reliable performance and durability. Users can easily select from multiple water modes, including alkaline, purified, and acidic settings, using the intuitive digital interface and flow control valve.

Technical Specifications

Electrode Plates	5 or 7 plates
Plate Construction	Pure Titanium, Platinum Layer, Ion Membrane
Net Weight	4.5 kg
Packing Size	405 x 370 x 206 mm

Performance Metrics

Available Water Modes

- 4 Alkaline levels
- 1 Purified level
- 2 Acidic levels

Key Performance Metrics

9.6 pH

Max pH Level

2000 L

Total Capacity

350 ml/min

Max Flow Rate

Physical Attributes

Color

Black

Case Material

Plastic
