

Countertop Espresso Machine with Milk Frother

This espresso machine features a 15-bar pump and a built-in milk frother. It has a removable water tank and drip tray for easy cleaning.

Overview

Professional Espresso Experience

This compact countertop espresso machine is designed for efficient brewing and milk frothing, making it an ideal addition to any office or small cafe environment. Featuring a high-performance 15-bar pump, it ensures optimal extraction for rich, flavorful espresso shots every time. With an integrated milk frother, users can easily prepare cappuccinos and lattes, while the intuitive control panel simplifies operation for both single and double shot selections.
