Product Overview

Sleek countertop design suitable for modern kitchen or office environments.

Smart Hydrogen Water Solution

This countertop water dispenser provides an advanced solution for home and office hydration by combining RO purification with hydrogen-rich technology. It features a rapid 3-second heating system and a 6L large-capacity tank, ensuring instant access to hot, warm, or cold water. With a 3:1 wastewater ratio and integrated child lock, it balances high-performance filtration with safety and energy efficiency.

Technical Specifications

Power Requirements

2200 W

Heating Power

0.1 kw.h/24h

Daily Consumption

Capacity and Flow

6 L

Water Tank

30 L/h

Water Flow

Model

OLS-W25

Dimensions

475 x 240 x 430 mm

Filtration System

Multi-Stage Filtration

- PAC Composite Filter
- RO Reverse Osmosis Membrane
- Rear Carbon Rod Filter
- Electrolysis Hydrogen Module

Hydrogen Concentration

2000 ppb

Features

Temperature Settings

Cold • Warm • Hot

Safety Features

Child Lock, H2/O2 Separation Technology
