Overview

Compact Countertop Ice Maker

This efficient countertop ice maker is designed for quick and reliable ice production in home or office environments. Featuring a durable stainless steel housing and a convenient viewing window, it offers a seamless user experience with simple one-touch controls. The unit is optimized for performance with a compressor-based cooling system and includes intelligent indicators for water levels and ice capacity.

Performance

Daily Ice Production

12 kg/24H

Ice Making Capacity

Ice Cube Dimensions	11 x 24 x 30 mm
Refrigeration Type	Compressor air cooling
Refrigerant	R600a

Technical Specifications

Power Requirements

Voltage	Power
110-120V	120W
220-240V	105W

Capacity Details

- Water tank capacity: 1.8L
- Ice bin storage: 0.8kg

Climate Class

SN, N, ST, T

Physical Attributes

Construction Materials

Stainless Steel • Plastic

Product Dimensions

315 x 229 x 326 mm

Net Weight

7.53 kg

Features

User Controls

- One-touch ON/OFF operation
- Automatic cleaning mode
- Power indicator
- Full ice indicator
- Add water indicator
