Product Overview

Instant Hot & Purified Water Solution

This countertop water dispenser features an advanced 6-stage reverse osmosis filtration system, providing high-quality purified water on demand. Designed for modern kitchens, it eliminates the need for installation and offers instant heating capabilities with multi-stage temperature control. The compact desktop unit combines a 3L original water tank with a 1L waste water tank to ensure fresh, clean water is always available.

Technical Specifications

Tank Capacities

3 L

Original Water Tank

1 L

Waste Water Tank

Power Requirements

Parameter	Value
Rated Power	2100W
Voltage	220V
Frequency	50Hz

Rated Water Purification	2000 L
Initial Purification Rate	130 ml/min

Filtration System

Purification Technology

- PAC composite filter (removes sand, rust, colloids, and odors)
- Reverse Osmosis (RO) membrane (filters bacteria, microorganisms, and limescale)
- Rear composite carbon rod filter (enhances water taste)

Design and Compatibility

Housing Material	ABS
Dimensions	450 * 200 * 387 mm
Net Weight	7.3 KG

Features

Core Advantages	No Installation Required, 3 Seconds Instant Boiling, Multi-stage Temperature Control, Net-Waste Water Separation
