Product Overview

Professional Countertop Steam Oven

The HX-9216A series is a compact, high-efficiency steam oven engineered for rapid meal preparation in professional or home kitchens. Featuring dual quartz heating elements and a 10L capacity, it provides precise control through three preset temperature settings up to 250°C. With its intuitive 15-minute timer and easy-clean slide-out crumb tray, this unit offers both convenience and durability for demanding cooking environments.
