

CP7/CP8 SMT Pick and Place Nozzle

These pick and place nozzles are designed for use with FUJI CP7/CP8 SMT machines. The nozzles feature stainless steel construction and a side port for vacuum application.

Product Overview

Precision SMT Nozzles

These high-precision pick-up nozzles are engineered specifically for CP7/CP8 series SMT placement machines. Designed for reliable component handling, they feature a durable stainless steel construction with a distinct yellow circular head. Each unit is equipped with a dedicated side port for vacuum application, ensuring consistent performance during the surface mount assembly process.

Compatibility & Design

Construction

Stainless Steel • Yellow Circular Head

Compatible Machines

CP7, CP8

Available Models

Nozzle Specifications

Part Number	Description
01	CP7/S Pick Up Nozzle 0.7
ADCPH-9530	CP7/S Pick Up Nozzle 1.0
ADCPH-9540	CP7/S Pick Up Nozzle 1.3
ADCPH-9700	CP7/S Pick Up Nozzle 1.3 (MELF)
ADCPH-9550	CP7/S Pick Up Nozzle 1.8
ADCPH-9560	CP7/S Pick Up Nozzle 2.5
ADCPH-9710	CP7/S Pick Up Nozzle 2.5
ADCPH-9570	CP7/S Pick Up Nozzle 3.7
ADCPH-9580	CP7/S Pick Up Nozzle 5.0
