

# CPM-158 Water Pump

The CPM-158 is a robust water pump designed for water transfer, boosting pressure, and circulation. Constructed with a durable cast iron pump body and a powerful electric motor, it delivers reliable performance and long-lasting operation.

## ADDITIONAL IMAGES

## Product Overview

### Robust Centrifugal Performance

The CPM-158 is a high-efficiency centrifugal water pump engineered for reliable water transfer and circulation. Featuring a durable cast iron body and a thermally protected electric motor, it is designed for longevity in domestic, agricultural, and industrial environments. Its compact construction allows for seamless installation in confined spaces, making it a versatile solution for modern water management systems.

## Technical Specifications

### Primary Applications

- Domestic water supply
- Agricultural irrigation
- Pressure boosting
- Industrial circulation

### Key Features

Cast Iron Housing, Thermally Protected Motor, Compact Design, High Efficiency

## Performance Metrics

### Operational Efficiency

**158 CPM**

Model Series
