

CR Fuel Hose for Automotive Applications

High-quality CR (Chloroprene Rubber) fuel hose designed for automotive applications. This hose is engineered to withstand the harsh conditions of fuel systems, offering excellent resistance to fuel permeation, heat, ozone, and weathering.

Product Overview

High-Performance Automotive Fuel Hose

This CR (Chloroprene Rubber) fuel hose is engineered specifically for demanding automotive fuel systems. Designed to handle gasoline, diesel, and various fuel types, it offers superior resistance to heat, ozone, and environmental weathering. Its reinforced construction prevents kinking and collapse while ensuring optimal fuel flow and long-term reliability in diverse operating conditions.

Technical Specifications

Construction

- Smooth bore for optimal flow
- Reinforced structure
- Fabric braid reinforcement
- Resistant to kinking and collapse

Material	Chloroprene Rubber (CR)
Compatible Fuels	Gasoline, Diesel

Performance Metrics

Resistance Properties

Heat Resistant • Ozone Resistant • Weather Resistant • Fuel Permeation Resistant

Key Performance Indicators

1 High

Abrasion Resistance

1 High

Burst Strength
