

CR-MO Steel Diagonal Cutting Pliers

These professional-grade diagonal pliers are made from CR-MO steel for durability. They feature ergonomic handles for a comfortable grip during precision cutting tasks.

Product Overview

Precision Engineering

These professional-grade diagonal cutting pliers are crafted from high-quality CR-MO steel, ensuring exceptional durability and long-term performance. Designed with ergonomics in mind, the handles provide a comfortable grip that significantly reduces hand fatigue during extended use. They are an ideal tool for precision tasks, including electrical work, jewelry making, and other fine cutting applications.
