

# Cr-Ni Wire Cutters

These wire cutters are constructed from Cr-Ni for professional-grade use. They are designed for precision and reliability in various wire cutting applications.

## Product Overview

### Professional-Grade Wire Cutters

These professional-grade American wire cutters are engineered with Cr-Ni construction, ensuring superior durability and consistent cutting performance. Designed to handle a variety of wire cutting applications, they provide the precision and reliability required for demanding professional tasks. The ergonomic handle design is specifically crafted to ensure a comfortable grip and minimize hand fatigue during extended periods of use.

## Technical Specifications

Material	Cr-Ni (Chromium-Nickel)
Application	Wire Cutting, Professional Use, Industrial

## Features

### Key Features

- Cr-Ni construction for enhanced durability
- Ergonomic handle design
- High-precision cutting edges
- Reduced hand fatigue design
