

CR1620 3V Lithium Coin Cell Battery

This non-rechargeable 3V lithium coin cell battery is used in small electronic devices. It provides a stable voltage output and a long shelf life.

Product Overview

High-Performance Lithium Coin Cell

The CR1620 3V Lithium Coin Cell is designed for reliability in compact electronic applications. Featuring lithium manganese dioxide chemistry, this non-rechargeable battery provides a stable voltage output and extended shelf life. It is engineered to support micro, trickle, and pulse discharge requirements, making it an ideal power source for modern IoT and intelligent devices.

Technical Specifications

Nominal Voltage	3 V
Chemistry	Lithium Manganese Dioxide
Rechargeable	No

Applications

Common Consumer Uses

- Watches
- Calculators
- Remote Controls

Primary Applications

Computer, Internet of Things, Tire Pressure Gauges, Intelligent Transportation, Intelligent Medical, Intelligent Finance
