

CR17450 Lithium Primary Battery 3V

The CR17450 is a 3V lithium primary battery providing a dependable and long-lasting power source. It features a stable discharge voltage and wide operating temperature range, making it ideal for various consumer and industrial applications.

Product Overview

High-Performance Lithium Primary Power

The CR17450 is a 3V lithium primary battery engineered for high energy density and stable discharge voltage. It features a wide operating temperature range and excellent shelf life, making it a reliable power source for critical industrial and consumer applications. Designed for longevity, this battery provides a dependable solution for devices requiring consistent, long-term power delivery.

Technical Specifications

Nominal Voltage	3 V
Battery Chemistry	Lithium Manganese Dioxide (Li/MnO ₂)
Model	CR17450

Applications

Common Applications	Electricity Meters, Water Meters, Gas Meters, Heat Meters, Security Equipment, Medical Devices, GPS Tracking, RFID, Military
---------------------	--

Certifications

Compliance & Safety

ISO9001 • ISO14001 • CE • UL • UN • RoHS
