

CR2032 Lithium Button Cell Battery

High-performance CR2032 lithium button cell battery designed for various electronic devices. This 3V battery offers reliable and long-lasting power for applications such as watches, calculators, remote controls, and other small electronics.

Overview

High-Performance Lithium Power

The CR2032 lithium button cell battery is engineered to deliver reliable and stable power for a wide range of small electronic devices. Featuring a 3V output and a low self-discharge rate, these batteries ensure consistent performance and an extended shelf life. This package is specifically configured for convenience, containing 2 high-quality batteries ready for immediate use in professional and consumer applications.

Electrical Specifications

Nominal Voltage	3 V
Battery Chemistry	Lithium

Physical Characteristics

Cell Size	CR2032
Package Quantity	2 pcs

Key Features

Performance Attributes	Stable Voltage Output, Low Self-Discharge, Extended Shelf Life
------------------------	--

Applications

Typical Applications

- Watches
- Calculators
- Remote Controls
- Small Electronics
