

CR2032 Lithium Coin Cell Battery

This CR2032 battery is a 3V lithium coin cell commonly used in small electronic devices. It provides a reliable and long-lasting power source due to its lithium chemistry.

Product Overview

Reliable Lithium Power

The CR2032 lithium coin cell battery is a high-performance power solution designed for compact electronic devices. Featuring a 3V output and a 210mAh capacity, it ensures consistent energy delivery for watches, calculators, and remote controls. Its advanced lithium chemistry is free from mercury and cadmium, offering both environmental safety and a long shelf life of up to 5 years.

Technical Specifications

Voltage	3 V
Capacity	210 mAh
Dimensions	20.0mm x 3.2mm
Shelf Life	5 years
Storage Performance	After 12 months storage at specified conditions, discharge capacity is no less than 80% of original

Compliance & Safety

Environmental Compliance

Non-Hg • Non-Cadmium

Certifications

CE, ROHS, SGS, REACH, MSDS

Logistics

Packaging Options

- Tray Bulk
- Blister Card
