

Craft Beer Brewing System

This craft beer brewing system provides an integrated setup for efficient and high-quality production. It features automated processes for crushing, saccharification, fermentation, filtration, and packaging.

ADDITIONAL IMAGES

Overview

Turnkey Brewing Solutions

This comprehensive brewing system offers a complete turnkey solution for the production of craft beer, various wines, and distilled spirits. Designed for industrial-scale efficiency, the system integrates every stage from raw material processing to final packaging. It features advanced automation for saccharification, fermentation, and sanitation, ensuring consistent high-quality output for commercial beverage production.

Production Capabilities

Fruit Wine Varieties

- Grape wine
- Apple wine
- Waxberry wine
- Kiwifruit wine

Supported Beverage Types

Craft Beer, Wine, Liqueur, Distilled Liquor, Rice Wine, Yellow Wine, Fruit Wine

System Components

Integrated Process Workflow

Stage	Function
Raw Material	Storage and automated crushing
Brewing	Saccharification and yeast cultivation
Fermentation	Liquid fermentation management
Refinement	3-stage filtration and bright beer tank management
Packaging	Depalletizing, filling, sterilization, and downstream packaging
Sanitation	Full-auto CIP (Cleaning in Place) system

Automation & Control

Auto Crushing System • Auto Saccharification • Auto Yeast Propagation • Auto Liquid Fermentation • Full-auto CIP System
