Overview

Turnkey Craft Beer & Beverage Solutions

This comprehensive production line offers turnkey solutions for craft beer, distilled liquors, and various fermented wines. Designed for professional brewing operations, the system integrates everything from raw material handling to final packaging. With a focus on automation and precision, it ensures consistent quality across diverse beverage types including fruit wines and traditional rice wines.

Production Capabilities

Fruit Wine Specializations

- Grape Wine
- Apple Wine
- Waxberry Wine
- Kiwifruit Wine

Supported Beverage Types	Craft Beer, Distilled Liquor, Liqueur, Rice Wine, Yellow Wine, Clear Wine, Fruit Wine
---------------------------------	---

System Components

A comprehensive view of the brewing and fermentation assembly, featuring integrated stainless steel vessels and automated control systems.

Upstream Processing Units

- Raw material storage combination
- Auto crushing system (dry & wet selection)
- Auto saccharification combination system
- Auto yeast spread & cultivation system

Fermentation & Filtration

- Liquid fermentation tank system
- 3-stage filtration system unit
- Bright beer tank (BBT) system

Downstream & Packaging

- Full-automatic depalletizer
- Filling system
- Spraying sterilizing system
- Downstream packaging unit

Technical Features

Automation Level

Full-Auto CIP System • Auto Saccharification • Auto Fermentation Control • Full-Automatic Depalletizing

Construction Material

High-grade Stainless Steel

System Design

Turnkey Project, Modular Design, Scalable, Integrated Piping
