

Crane Elevator for Agricultural Machinery

This elevator is designed for agricultural construction machinery, specifically cranes. It features a robust construction with a wide base and a side handle for manual operation.

Product Overview

Robust Lifting Solution

This specialized crane elevator is engineered specifically for agricultural construction machinery. Featuring a robust construction with a wide base, it ensures maximum stability during operation. The cylindrical body includes a slotted top for secure lifting, while the integrated side handle allows for precise manual height adjustments in demanding environments.

Technical Specifications

Color	Black
Primary Application	Agricultural Machinery, Construction Cranes
Operation Mode	Manual

Design Features

Key Design Features

- Robust construction for durability
- Wide base for enhanced stability
- Cylindrical body design
- Slotted top for secure lifting interface
- Side handle for precise height adjustment
