

# Crane Slewing Ring for Tadano, Kanglim, and Kato Cranes

This slewing ring is designed for Tadano, Kanglim, and Kato cranes. The substrate body has a hardness of 230HB or above, ensuring stable performance.

## Product Overview

### Precision Slewing Bearing Solution

This high-performance slewing ring is engineered for optimal rotational movement in demanding heavy-duty lifting applications. Designed to meet stringent industry standards, it offers exceptional load-bearing capacity and structural stability. This component is an ideal replacement part for professional-grade crane systems in construction and industrial sectors.

## Technical Specifications

### System Compatibility

- Tadano Z300
- Tadano Z290
- Kanglim
- Kato

### Manufacturing Features

Raw Material Selection, Teeth Q&T, Precision Machining, Integrated Assembly

## Performance

### Key Performance Indicators

**1 Grade**

Rotational Reliability

**1 High**

Load-Bearing Rating
