

Crane Windshield Wiper System

This system provides reliable wiping action for crane windshields. Its durable construction ensures a long service life.

Product Overview

Industrial Crane Wiper System

This high-performance crane windshield wiper system is engineered for longevity and reliable operation in demanding industrial environments. The set includes a precision-designed motor, a robust multi-arm linkage system, and a high-durability wiper blade to ensure clear visibility. Recognized for its excellent quality, this system provides consistent cleaning performance and a significantly extended service life for various crane models.

Technical Details

Included Components

- Compact wiper motor
- Robust multi-arm linkage system
- Curved windshield wiper blade

Key Performance Attributes

Long service life, High quality, Synchronized movement, Effective cleaning
