Product Overview

Precision Engine Timing

This crankshaft position sensor is a critical component designed to monitor engine crankshaft position, ensuring optimal ignition timing and overall engine performance. Engineered as a direct replacement part, it is essential for maintaining the efficiency and reliability of your off-road vehicle. This sensor is specifically compatible with a wide range of 800cc engine platforms used in various utility and all-terrain vehicles.

Technical Specifications

Direct replacement crankshaft position sensor designed for optimal engine timing and reliability.

Application Type

ATV • UTV • Gokart

Part Number

HS2V91MW

Compatibility

Compatible Engine Models

- HS400
- HS500
- HS550
- HS600
- HS700
- HS800
- HS900
- HS1000

Compatible Series

Tactic, Forge, Youth, Sector, Strike
